

## Fast Break 5904

### Products/Procedures

**FABRITEC 5904 FAST BREAK** is a heavy alkaline detergent booster that aids in the removal of tough, greasy, heavily soiled fabrics, collars and cuffs.

The product is recommended for greasy linens and health care textiles and also boosts the power of laundry detergents. Also recommended for hard water situations.

For best results, the booster should be added via an injection system along with the correct amount of detergent as determined by soil level and load size. Recommended usage for FAST BREAK is 2-4 oz. per 50 pounds.

**Caution: Monitor the correct fabric pH to ensure that the correct amount of sour is used in the wash process. Acceptable pH is 6.5-7.0.**
