

Fabritec 5936 CONDITION-IT

Products/Procedures

Fabritec 5936 CONDITION-IT is a specialized additive used in the wetcleaning of fine washables. It is not for use in drycleaning solvent. 5936 CONDITION-IT minimizes shrinkage, felting and pilling in wetcleaning washable wool, silk, rayon and all natural fiber blends. It enhances fabric hand and facilitates garment finishing. It is formulated to be used in conjunction with **Fabritec 5914 Silky Clean** and **5925 Cotton Clean** Detergents. These products are ideally suited for use in the new, sophisticated wetcleaning machines.

Always follow the garment care label instructions.

Add 5936 CONDITION-IT to the final rinse using low level and cold water. Add 2 to 3 oz. per 10 lb. of garments or 1/2 oz. per gallon of water in the bath. Extract and dry according to care instructions. If hand washing, use 1 oz. per gallon of water in the final rinse.

PHYSICAL PROPERTIES:

Appearance: Clear to slightly hazy light yellow liquid

Odor: Mild

Density: 8.4 lbs./ga

Flash Point: >200 °F

Solubility: Complete in water

pH: 5
